Key Benifits

Microsoft Dynamics AX

The benifit of using SW-Tools:

☑ Localised table and field names, so that the user does not have to work with English names when for example German names are available.

☑ Includes all enumerated field values and field documentation according to the localisation made in Axapta/XAL/C5.

☑ Includes all predefined relations between tables setup in the Axapta/XAL/C5 system.

☑ Built-in features to control multiple companies. This provides an easy way of users to work within a specific company but also the ability to define consolidation reports over multiple companies.

☑ Reports, Queries and Data entry applications may be defined with ease without using any SQL statements.

☑ Any report, query and data entry application runs via a browser when using SW-Tools NET-TRIO.

Key Benifits

Microsoft Dynamics NAV

The benifit of using SW-Tools products in connection with Financials/Attain compared to other SQL report and query tools is:

☑ Using C/Front for better and faster access. Both for the C/SIDE and SQL option.

Icolised table and field names, so that the user does not have to work with English names when for example German names are available.

Automatically retrieves lookup field definitions as table relations + more than 1000 additional table relations.

- Reports, Queries and Data entry applications may be defined with ease without using any SQL statements.
- Any report, query and data entry application runs via a browser when using SW-Tools NET-TRIO.
- Printout directly in HTML, PDF and other formats.
- Print archiving and much more...
